

1123R – Radio Signal Repeater & Transceiver

P/No. A5439

The 1123R is a mains powered unit and is used to extend radio signal coverage. It may also be required if radio 'black spots' are a problem due to building structure.

The 1123 requires mains power via either our:

12v power supply unit

P/No. A3684

or

12 Volt PSU with standby battery

P/No. A1871

Size (mm) 220 L x 140 W x 40 D

1122 - Portable Radio Panic Button (PPB)

This small unit is suitable for staff working away from fixed panic buttons and clips onto a belt or pocket.

The 1122 PPB is powered by 2 x AAA batteries, and benefits from the low battery alert function.

Size (mm) 95 L x 46 W x 25 D

P/No. A4639

1122P - Portable Belt Pull Radio Panic Button

For high security premises there is a leather belt strap version. The body of the unit is grabbed and pulled to activate a panic call.

The 1122P is powered by 2 x AAA batteries, and benefits from the low battery alert function.

Size (mm) 95 L x 46 W x 25 D

P/No. A5436

1115P - Portable Panic Button with Lanyard

This battery powered portable panic button comes with a lanyard, so can be worn round the neck.

The 1115P is powered by 1 x CR2032 battery, and benefits from low battery alert software.

Size (mm) 85 L x 48 W x 15 D

P/No. A5437

1115W - Portable Wrist Strap Panic Button

This battery powered portable panic button comes with an elasticated wrist strap with Velcro fastening.

The 1115W is powered by 1 x CR2032 battery, and benefits from low battery alert software.

Size (mm) 70 L x 45 W x 20 D

P/No. A5438
